

TECHNICAL DATA SHEET

HAND SANITIZER

PRODUCT # 11175

In response to the health crisis created by COVID-19, Lucas Oil Products has decided to introduce a hand sanitizer in a 64-fluid ounce (2-Quart) refill bottle. Lucas Oil has held strictly to the FDA guidance on alcohol based hand sanitizer found in FDA's recent policy release (see <https://www.fda.gov/media/136289/download>), so our customers can be assured of the efficacy and performance of our product. Some of the features and benefits of our product:

- **Topical Solution of 80% Ethyl Alcohol**
- **Water Thin Formula**
- **Formulated in Accordance with FDA Recommendations**
- **Manufactured and Packaged in an FDA Registered Facility**
- **Fast Acting Antiseptic**
- **Unscented with a milder odor than isopropyl alcohol based formulas**

Hand sanitizers can be drying to the skin. Our product contains a small amount of glycerin to help reduce that tendency. Lucas Hand Sanitizer is an ideal product to carry with you and use when soap and water are not conveniently available.

Safety Note: Alcohol solutions are flammable. Exercise caution and keep away from open flames or other sources of ignition.
